6. Customers, partners and market

- Customer mix by ARR (FY2025-26): North America 41%, Europe 27%, India 22%, APAC excluding India 10%.
- Industry mix: Financial services 26%, Software/Internet 21%, Healthcare 14%, Logistics 12%, Manufacturing 11%, Education 6%, Other 10%.
- Largest single customer accounts for 3.8% of ARR; top 10 customers account for 19% of ARR.
- Cloud partners: AWS (Advanced Tier Partner), Microsoft Azure (Marketplace listing), Google Cloud (Marketplace listing since March 2025).
- Reseller partners in Germany, Japan, Indonesia and the UAE. Partner-sourced revenue was 17% of new bookings in FY2025-26.
- Net Promoter Score (NPS) for FY2025-26: 54. Customer support CSAT: 94.2%.

7. Responsible AI principles

- **No training on customer data by default.** Customer content is never used to train HexaAI's foundation models unless the customer explicitly opts in to the HexaAI Improve Program.
- **Grounded answers.** HexaChat shows citations for every answer and abstains ("I could not find this in your documents") when evidence is missing.
- **Human oversight.** HexaFlow agents that send money, delete data or email external parties require a human approval step by default.
- **Evaluation before release.** Every model release must pass the HexaEval suite (hallucination rate below 2.5%, refusal accuracy above 95%, toxicity below 0.1%).
- **AI Ethics Board.** A 5-member board (2 external members) reviews high-risk use cases quarterly and can veto launches.
