HexaAI Customer Policies: Trials, Billing, Refunds, SLA and Data

Document ID: HX-POL-CUST-004 | Version 3.2 | Effective: July 1, 2026 | Owner: Legal and Revenue Operations | Applies to all HexaAI products

1. Free trials

- **14-day free trial** for HexaChat Growth and HexaFlow Team. No credit card is required.
- Only **one free trial per company email domain** per product. Trials created with personal email domains (e.g., gmail.com) are limited to 3 users.
- Trials are limited to 25 users (HexaChat) or 5,000 runs (HexaFlow).
- Enterprise proofs of concept (POCs) can be extended to **30 days** with approval from the Account Executive's Regional Sales Director. POCs longer than 30 days require a paid pilot (from $5,000).
- If a trial is not converted, trial data is deleted **15 days after the trial ends**.
- HexaVision, HexaGuard and HexaEdge have no time-limited trial; they use the free monthly tiers described in HX-PRC-2026 instead.

2. Plan changes

- **Upgrades** take effect immediately and are charged pro-rata for the rest of the billing period.
- **Downgrades** take effect at the start of the next billing period (monthly) or at renewal (annual). Annual contracts cannot be downgraded mid-term.
- Adding users to an annual contract is charged pro-rata; removing users takes effect only at renewal.
- Annual contracts **auto-renew** for the same term unless either party gives written notice at least **30 days before the renewal date**.

3. Cancellation and refund policy

Situation	Refund outcome
Monthly plan cancelled at any time	Cancellation takes effect at the end of the current billing month. No refund or credit for the partial month.
Annual plan cancelled within the first 30 days of the initial term	Full refund ("30-day money-back guarantee"). Applies to the first year of a new customer only, not renewals.
Annual plan cancelled after 30 days and up to 6 months into the term	Pro-rata refund of the unused months minus a 15% early termination fee on the refunded amount.
Annual plan cancelled after 6 months	No refund. Service continues until the end of the term.
HexaVision / HexaGuard prepaid credits	Non-refundable. Credits expire 12 months after purchase.
Setup fees, custom fine-tuning, professional services	Non-refundable once work has started.
Duplicate charge or billing error	Full refund within 10 business days of confirmation.
HexaAI terminates for its own convenience	Pro-rata refund of all prepaid unused fees with no termination fee.

Refund requests must be sent to **billing@hexaai.example** from an account admin email. Approved refunds are issued to the original payment method within **10 business days** (card) or **20 business days** (bank transfer). Refunds above USD 25,000 require CFO approval. **Example:** a customer on an annual HexaChat Growth contract of $24,000 who cancels after 4 months gets 8 unused months = $16,000, minus a 15% fee ($2,400), so the refund is $13,600.

4. Service Level Agreement (SLA)

Plan	Monthly uptime commitment	Notes
Starter (all products)	No SLA (target 99.5%, best effort)	No service credits
Growth / Team / Business	99.9%	About 43 minutes of downtime allowed per 30-day month
Enterprise	99.95%	About 22 minutes of downtime allowed per 30-day month

4.1 Service credits

Monthly uptime achieved	Service credit (% of that month's fee for the affected product)
Below commitment but at or above 99.0%	10%
95.0% to below 99.0%	25%
Below 95.0%	50% (maximum credit)

- Credits must be requested within **30 days** after the end of the affected month via support ticket.
- Credits are applied to the next invoice; they are not paid out in cash and expire if the contract ends.
- **Exclusions:** scheduled maintenance announced at least 72 hours in advance (maximum 4 hours per month, Sundays 02:00-06:00 UTC), customer-caused issues, third-party LLM provider outages when the customer uses BYOK, and beta features.
- Status page: status.hexaai.example. Incidents affecting more than 5% of customers are posted within 15 minutes.

5. Support severity definitions

Severity	Definition	Example
Sev 1 - Critical	Production is down or unusable for most users; no workaround.	HexaChat returns errors for all users; API returns 5xx for over 50% of requests.
Sev 2 - High	Major feature degraded; workaround exists or limited users affected.	One connector (e.g., SharePoint) stops syncing.
Sev 3 - Normal	Minor issue, question or feature request.	How to configure SSO group mapping.

Response time targets per severity depend on the support plan (Standard, Priority, Premium) and are listed in HX-PRC-2026, Section 9. Response time means the first human response, not resolution.

6. Data handling, retention and privacy

Data type	Retention
Customer content (documents, prompts, outputs)	Kept for the subscription term. Deleted within 30 days after termination; deletion is completed within a further 15 days (45 days maximum).
Backups	Encrypted backups are purged within 90 days after termination.
Application and audit logs	180 days (HexaGuard Enterprise: 1 year). Logs do not contain document content.
Trial data	Deleted 15 days after the trial ends if not converted.
HexaChat Enterprise zero-retention mode	Prompts and outputs are not stored at all; only metadata (timestamps, token counts) is kept for 30 days for billing.
Billing records	8 years (to meet Indian and German tax law).

- **Data residency regions:** US (us-west, Oregon), EU (eu-central, Frankfurt) and India (ap-south, Mumbai). The region is chosen at signup and cannot be changed later without a paid migration ($3,000). A Singapore region is planned for Q2 2027 but is not available today.

- **Encryption:** AES-256 at rest, TLS 1.2+ in transit. Customer-managed keys (BYOK/KMS) are available on Enterprise plans only.
- **Model training:** customer content is never used to train or fine-tune HexaAI foundation models unless the customer opts in to the HexaAI Improve Program.
- **Sub-processors:** list is published at trust.hexaai.example; customers get 30 days' notice before a new sub-processor is added.
- **Data export:** admins can export all content and chat history in JSON at any time and for up to 30 days after termination.
- **Data Protection Officer:** based in Berlin, contact dpo@hexaai.example.

7. Security incident notification

HexaAI notifies affected customers of a confirmed security incident involving their data within **48 hours of confirmation** (**24 hours** for Enterprise customers), by email to the account's security contact. A preliminary root cause analysis (RCA) is shared within 5 business days and a final RCA within 15 business days. Vulnerability reports can be sent to security@hexaai.example; HexaAI runs a private bug bounty with rewards from $200 to $15,000.

8. Acceptable Use Policy (summary)

- Prohibited: generating malware, attempting to extract model weights, high-volume scraping of HexaAI outputs to train competing models, surveillance of individuals without legal basis, and fully automated decisions about credit, employment or housing without human review.
- Prohibited: uploading data you do not have rights to, and any use that violates export controls or sanctions.
- HexaAI may suspend accounts that violate this policy after notice; immediate suspension is allowed for active attacks or illegal content.
- API keys must not be shared publicly. Leaked keys detected by HexaAI are revoked automatically and the admin is notified.

9. Account closure

An account owner can close an account from HexaConsole under Settings > Billing > Close account, or by emailing billing@hexaai.example. Outstanding invoices must be paid before closure. Closure triggers the retention schedule in Section 6. Closed accounts can be reactivated within 30 days with all data intact; after 30 days data recovery is not possible.
